---

### SOFT SKILLS

- Time estimation & task prioritization
- Problem-solving mindset
- Strong communication & collaboration

**English:** Basic Communication Skills

---

### EXPERIENCE

#### Junior Frontend Developer

*Estuary Solutions JSC – District 3, HCM | July 2024 – Present*

- Developed web applications using **React.js, Next.js, and Vite**
- Migrated from **Webpack to Vite**, improving **hot module reloading** and **starting time speed by ~70%**
- Upgraded projects to **React 18** for performance and developer experience enhancements
- Built **responsive, cross-platform UIs** and **optimized performance**
- Integrated third-party libraries and **OAuth providers (Google, Microsoft)**
- Implemented **i18n for multilingual** support
- Collaborated in **Agile** teams across design, product, and backend
- Used **GitLab CI/CD pipelines** for deployment automation
- Worked with Product Owner to **define features, priorities**, and roadmaps
- **Managed multiple projects** simultaneously under **tight deadlines**

## Intern & Fresher Frontend Developer

*Estuary Solutions JSC – District 3, HCM | May 2023 – July 2024*

- Gained experience managing app state with **Zustand** and **TanStack Query**
- Delivered components following team standards and design specs
- Participated in planning, QA, code reviews, and team retrospectives
- Practiced **time management** and task ownership in **sprint workflows**

---

## PROJECTS

### Web Management System – Herbalife

*Position: Frontend Developer | Team Size: 25+*

*Tech Stack: React 18, TypeScript, Vite, Zustand, AntD, Firebase, Recharts, i18n, GSAP, TanStack Query, Google Analytics*

A platform for admins and staff to manage memberships, customer profiles, and events across 11 countries.

- Built **e-learning modules, social networking features, and event tools**
- Implemented animated UI using **GSAP**
- Developed a **mobile-first microsite lucky wheel game** to increase user engagement
- Migrated codebase to React 18 + Vite, reducing development build times by ~70%
- Enhanced developer experience and app scalability

### Customer Complaint Management Hub – Dehues

*Position: Frontend Developer | Team Size: 13+*

*Tech Stack: React 18, TypeScript, Ant Design, Vite, Zustand, TanStack Query, Recharts, Azure MSAL, i18n*

An internal complaint tracking tool used in Vietnam, Myanmar, Cambodia, and Thailand.

- Developed complaint workflows, validation modules, and reporting dashboards
- Built reusable, scalable components
- Enhanced complaint handling efficiency and UI responsiveness

---

## EDUCATION

### FPT Polytechnic College HCM

*Web Development – GPA: 9.02*

Quang Trung Software City, HCM | October 2020 – March 2023
