*" Watching the **Silicon Valley series** at the age of 19 , now I'm a **Frontend Developer** "*

EDUCATION

Associate Degree in Web Development   Graduated, December 2022

FPT Polytechnic | Quang Trung Software Park, HCM City
- GPA: 9.02

SOFTWARE DEVELOPMENT EXPERIENCE

Frontend Development, UIX | Go Vap, HCM   April 2022 – April 2024

• Led a team of 5 frontend developers to build project from the scratch, overseeing task assignments and ensuring timely project delivery.

• Develop user-friendly interfaces and optimize web performance with React.js and Next.js.

• Collaborated with backend developers to seamlessly integrate frontend and backend systems.

• Mentor interns, providing guidance on frontend development, code reviews, and project management.

SOFTWARE & DESIGN PROJECTS *- visit my website to get more details*

Track Work Progress Website, *Fullstack Web Programming - https://taskify-dhduy.vercel.app*   May 2024
- Built a dynamic track work progress platform using Next.js (frontend) and Prisma ORM with MySQL (backend), implementing authentication (Clerk) for secure access control.
- Implemented features including activity log, drag-and-drop functionality, and organization switching.
- Upgraded to a Pro version with premium features by integrating Stripe for online payment processing.

Customize Phonecase Website, *Fullstack Web Programming - https://casecobra-dhduy.vercel.app*   February 2024
- Develop a dynamic customize phonecase platform using Next.js (frontend) and Prisma with PostgreSQL (backend), while ensuring seamless authentication via Kinde for secure user access.
- Implemented drag-and-drop file upload functionality to enhance user interaction and customization options
- Integration of Stripe for online payment processing.

Online Graphic Design Tool, *Frontend Web Programing*   August 2023
- Responsible for developing user-friendly web interfaces, including multilingual and light/dark mode.
- Collaborated with 7 team members to test performance, relatability and code of design feature.
- Conducted research to develop an image cropping algorithm based on vector equations, resolving a critical bug that previously stumped the entire team.

TECHNICAL SKILLS

Frontend Core: HTML, CSS, Javascript, React, NextJS.
Frontend Libraries: React-query, Zustand, Ant design, SCSS, Tailwindcss, Shadcn-ui, MUI
Experienced: Prisma, MongoDB, Redux, Websocket, NodeJs, RESTful APIs, Vuejs, Nuxtjs, React Native, Jest
Other tools: Docker, Git, Gitlab.
Workflow: Jira, Trello, Slack, Notion, Figma.
Orther skills: English – APE Level 3 Top Notch 2, teamwork, research new technology, passion for programming.
